## PERSONAL PROJECTS

- Created a flight booking platform with booking, cancellation, and flight details features using ReactJS and Spring Boot.
- Developed a user-friendly interface for seamless user experience.

## About Me

- Full Stack Developer with 2+ years of experience
- Passionate about creating forward-thinking solutions to address tomorrow's productivity challenges
- Committed to contributing to the success of any company I work with
- Technical expertise includes a strong understanding of JavaScript and React Js architecture and development

## Professional Experience

Capgemini Technology Services India Ltd.
Associate Consultant

Feb 2021 – Present

**Key responsibilities:**

- Developed user-friendly and responsive web interfaces using React JS and JavaScript, optimizing code for improved performance and increased execution speed by 30%.
- Build an enterprise-level backend API with Spring Boot, advanced Java, and REST languages to support over 50k daily transactions.
- Deploy Nine applications on OCP and PCF platforms, ensuring successful readings of logs in the cloud space.
- Collaborate with project managers and development teams to assess customer feedback, prioritize new features, and drive product provisioning.
- Identify and address root causes of user interface issues, and proposed creative solutions to increase efficiency for users.
- Test and evaluate applications to ensure industry standard compliance and compatibility with various devices and operating systems.
- Prepared guidelines for writing maintainable code and attaining over 95% test coverage on all web applications.
- Staying up-to-date with the latest web development trends and technologies to ensure that the product is using the most effective tools available.
- Creating and maintaining documentation related to the development process, including code documentation, user guides, and technical specifications.
- Mentor junior developers and teach skills in React and JavaScript to improve overall team performance.
