Professional Summary

React Developer with 5.5+ years of experience building scalable enterprise web applications for banking and fintech organizations. Expertise in React.js, TypeScript, Redux Toolkit, Next.js, component-driven architecture, REST API integration, performance optimization, accessibility (WCAG), and modern frontend engineering practices. Proven track record of improving application performance, mentoring developers, conducting code reviews, and delivering secure, high-performance applications in Agile environments.

Technical Skills

Frontend Technologies: React.js, Next.js (App Router, Pages Router), JavaScript (ES6+), TypeScript, HTML5, CSS3

UI Development: Material-UI (MUI), Tailwind CSS, Bootstrap, Styled Components, CSS Modules, SASS/SCSS, Responsive Design, Web Accessibility (WCAG)

API & Backend Integration: RESTful APIs, GraphQL, Axios, API Routes, Server Actions, Microservices

Testing & Quality: Jest, React Testing Library, Unit Testing, Code Reviews, Secure Coding

DevOps & Tools: Git, Jenkins, CI/CD Pipelines, Docker, Kubernetes, Webpack, PCF, OpenShift (OCP)

Backend Technologies: Java, Spring Boot, REST APIs

Databases: PostgreSQL, SQL, NoSQL

Domain Expertise: Banking, Financial Services, Fintech, Merchant Onboarding, Credit Card Management, Fraud Management, Partner Management

Practices: Agile/Scrum, Performance Optimization, Secure Coding, Code Reviews

Professional Experience

Programmer Analyst, Bitwise Global

August 2025 – Present

- Developed a fintech CRM platform using Next.js 14, React.js, TypeScript, React Server Components, SSR, and ISR for merchant onboarding, partner management, and transaction reporting.
- Built a scalable multi-portal, component-driven fintech CRM platform with reusable React components for merchant onboarding, partner management, and transaction reporting.
- Developed merchant onboarding workflows and multi-step form wizards with real-time validation using reusable React components and custom hooks.
- Implemented RBAC, secure PCI-DSS-compliant authentication flows, following secure coding practices and passing internal security audits on the first submission.
- Built interactive residual-reporting and transaction analytics dashboards with responsive, accessible UI, replacing manual Excel reporting for 50+ partners.
- Integrated RESTful APIs across a microservices architecture for payment gateway configuration, merchant account management, and real-time transaction status, reducing data latency through request batching and SWR caching.
- Designed and delivered a shared component library and custom hooks package, reducing cross-portal duplication and standardizing UI architecture.
- Achieved 95% unit test coverage on critical React components using Jest and React Testing Library, ensuring reliable and maintainable code.
- Led frontend development by defining scalable component-driven architecture, implementing reusable UI components, and promoting React best practices.
- Participated in design discussions and code reviews, ensuring code quality, maintainability, and adherence to enterprise standards.

- Collaborated with architects, backend engineers, product owners, and QA teams to deliver scalable, high-performance frontend solutions in Agile environments.

Associate Consultant, Capgemini

February 2021 – July 2025

- Developed responsive and accessible enterprise web applications for banking and financial services clients using React.js, Redux Toolkit, JavaScript (ES6+), HTML5, and CSS3.
- Built customer-facing dashboards for account management, transaction history, and financial reporting with real-time REST API integration.
- Designed reusable React components for form-intensive financial workflows, including customer account management, fraud verification, and credit card loss processes.
- Improved frontend performance by 45% through code splitting, tree shaking, lazy loading, and React performance optimization techniques.
- Spearheaded migration of legacy applications to modern React architecture, reducing production bug reports by 40%.
- Deployed and maintained enterprise applications on PCF/OpenShift using CI/CD pipelines, ensuring 99.9% uptime and reliable production releases.
- Developed secure, PCI-DSS-compliant financial workflows following enterprise secure coding standards and compliance requirements.
- Mentored 5+ developers through technical guidance, code reviews, and React best practices, reducing onboarding time by 50%.

Education

Bachelor of Engineering,
Dr. D. Y. Patil Institute of Technology, Pune University
First Class with Distinction

2016 – 2020
